## Book Review

### ABOUT THE BOOK

Title : Swami

Author : Ranjit Desai

Publication : Mehta Publication House

ISBN : 8177666444

Seller : Landmark Ltd.

### ABOUT THE AUTHOR

'SWAMI' is the award winning Marathi novel by a well-known writer Ranjit Desai. It was published in 1962 for which Ranjit Desai received many awards including the Sahitya Akademi Award in 1964.

It is a very touching and sensitive novel which portrays the life of Madhavrao Peshwa and his relationship with his wife Ramabai Peshwa. It was later adapted to a marathi serial with a same name in 1994.

Ranjit Desai [1928-1992]. He was born in 1928 in the town of kowad in Kolhapur district of Maharashtra . This brilliant author has numerous novels, plays, short stories and movie scripts to his credits. He has won five highest awards for his novel swami. Ranjit Desai has adopted the skill of beautifully portraying the life of Madhavrao Peshwa which brings tears to ones eyes everytime one reads it.

### INTRODUCTION

Madhavrao was the second son of Gopikabai and Peshwa Balaji Bajirao (Nanasaheb Peshwa). At the time of his birth, Maratha Kingdom was stretched across sizeable portion of India. On 9<sup>th</sup> December 1753, Madhavrao married Ramabai .

After the death of Nanasaheb, on 20 July 1761, the sixteen year old Madhavrao was made the next Peshwa of the Maratha empire. Nanasaheb's brother Raghunathrao was to assist him in the administrative affaris.

Early Days Of Reign :

At the ascendancy of Madhavrao , the Maratha empire was in complete shambles as their defeat at Panipat had accumulated big debts to their wealth. At Shaniwarwada, the prime residence of the Peshwa, religious rituals and ceremonies were frequently being conducted. The security at the treasury was poor.

When these weaknesses were brought to Madhavrao's notice, he introduced changes by personally looking into the administration, accounts and the treasury and also reduced the religious practices at Shaniwarwada.

On February 1762, the Peshwa conquered Karnataka Due to differences in opinion between Madhavrao and Raghunathrao, Raghunathrao decided to abandon the troop towards Nizam midway and returned to Pune, while Madhavrao continued.

Madhavrao and Raghunathrao had their preferences even over the Sardars (generals).

## Madhavrao's Nature

During this time an interesting incident occurred. One day a large crowd was anxiously waiting at the entrance of shaniwarwada to express their unbearable losses of families, house, wealth etc. He personally met the impoverished families and made a note of every family's loss and compensated it from the empire's revenue. This speaks volumes about why the citizens always looked upon to him with faith and respect.

Though there were rifts between Madhavrao and his uncle, Madhavrao always expressed concern for him on personal grounds. Madhavrao also fined his maternal uncle Rastemama for allowing the nizam's men to plunder Pune while his own house was spared.

Madhavrao had great respect, love and regards for his mother, which is visible in the letters exchanged between the two.

Corrupt and lethargic officials were of logg in the courtyard. The judicial system was impartial faithfully managed by Ram Shastri.

Artillery and weapons were constantly upgraded. Despite being a Brahmin he raised his sword to the call of duty and was no less in valour than any Maratha.

# plagiarism.org

We all heard about Plagiarism check while publishing or submitting any research work. At the time of projects, articles or Masters, M.Phil or Ph.D. these submission now all universities made it compulsory to check the report through plagiarism check software. Since last year Savitribai Phule Pune University started providing access to Turnitin plagiarism detection software (ONLY FOR RESEARCH GUIDES)

Most of us know that Plagiarism is copying work of another person or borrowing original ideas of other people. Merriam-Webster Online Dictionary mentioned the meaning of Plagiarize means

- to steal and pass off (the ideas or words of another) as one's own
- to use (another's production) without crediting the source
- to commit literary theft
- to present as new and original an idea or product derived from an existing source

In other words, plagiarism is an act of fraud. It involves both stealing someone else's work and lying about it afterward.

According to U.S. law, the answer the ideas and words can be stolen. The expression of original ideas is considered intellectual property and is protected by copyright laws, just like original inventions. Almost all forms of expression fall under copyright protection as long as they are recorded in some way (such as a book or a computer file).

Turning in someone else's work as your own, copying words or ideas from someone else without giving credit, failing to put a quotation in quotation marks, giving incorrect information about the source of a quotation, changing words but copying the sentence structure of a source without giving credit, copying so many words or ideas from a source that it makes up the majority of your work, whether you give credit or not (see our section on "fair use" rules) are considered as plagiarism.

Most cases of plagiarism can be avoided, however, by citing sources. Simply acknowledging that certain material has been borrowed and providing your audience with the information necessary to find that source is usually enough to prevent plagiarism.

## Call for Chapters: E-Discovery Tools and Applications in Modern Libraries

### **Editors:**

Egbert De Smet, (University of Antwerp, Belgium)

Sangeeta Namdev Dhamdhare, (Modern College of Arts, Science and Commerce, India)

### **Call for Chapters:**

Proposals Submission Deadline: **May 30, 2015**

Full Chapters Due: **August 30, 2015**

### **Introduction:**

All Scientific Information is now publishes online. Researchers, scientists, authors are publishing their work online. Various online publishing platforms are available easily. Publishers prefer to publish online than print. Libraries started giving access to electronic databases, journals, books and other scholarly material also their resources and give access online, offline along with online catalogues of books and existing library material. Libraries are looking for new platform through which their users can access information from various databases on a single search window.

The topic of this book is related to new Information Discovery tools used by various libraries to give access to their resources both online (paid or free), digitized resources and catalogues on one platform which we can call as Federated Search Engine. Very few open sources federated search tools are available. Few federated search tools like example Knimbus, Mendeley, EBSCO Discovery services, Fedgate, ABCD Site, etc being used by libraries to give access to all subscribed online e-resources as well as print resources in the library to save the time of readers and give easy access to multiple databases and resources.

The library portals are now considered as Mirror of that library which gives idea about its collection and services. Library portal contains multiple databases and search engines. No aggregation at metadata level, disconnection among the resources were drawbacks of earlier library portals. There was confusion among the students to locate resources from various databases and also was time consuming process. So need of discovery service/tool i.e. single window access raised. Small libraries are still looking for the solution which is available freely as they cannot afford the commercial softwares for giving federated search for their resources (Online and archives).

Digital library softwares like Greenstone, Dspace, etc are not a complete solution to give access to library resources like archives, online databases and scholarly publications as every publisher has their own connectors. Without MOUs and agreement the many publishers do not give access to their connectors.

This book aims to give the current scenario of E-Information Discovery Tools used by different libraries from the globe, innovative techniques used by the libraries for information discovery, open source softwares as well as commercial softwares, connector based technologies used by libraries , their applications, case studies and best practices in this area.

### **Objective:**

Currently, libraries are subscribing various online databases, ejournals, ebooks, etc in the library. To give quick access to all the library resources, archives, catalogues and online information on a single search window is challenge in front of libraries. Digital library softwares gives access to only digital resources and gives path to other online resources. Catalogues and Library Management Systems can't manage the resources distributed all over the world. E-Information Discovery tools are the tools which gives access to all library resources (existing as well as online) using federated search and connector based technology. Different libraries using different technologies to give such single search on their website or portal. To give remote access to resources different libraries uses different technology (inhouse or commercial or open source).

Still many libraries in developed countries also not yet shifted to this technology. Developing countries are looking for such E-Information Discovery tools for their libraries in low budget or free of cost. This book aim to give new innovative ideas and techniques along with tools to solve the Information retrieval problem.

**Target Audience:**

The target audience for this book includes (but is not limited to): Library and Information Professionals, Software Professionals, Library Science Scholars, Library and Information Science Students, Academicians, Information Professionals, Search Engine Providers

**Recommended Topics:**

Information Discovery Tools used in libraries, Comparative study of E-Discovery Tools used in the libraries, Connector Based Technology for Federated Search, Federated Search Tools : Open Source and Commercial, Digital Libraries, Library Portals, Indexing Techniques for online resources, Role of Librarian in Indexing online resources, Case Studies, Advantages and Disadvantages of E-Info Discovery Tools, Global Perspectives, Future of E-Info Discovery Tools, E-Publishing and database connectors, Digital Resources and Archives, Webbased Library Services, Best Practices for Information Retrieval, etc, Impact of E-Discovery tools on libraries

**Submission Procedure:**

Researchers and practitioners are invited to submit on or before , a chapter proposal of 1,000 to 2,000 words clearly explaining the mission and concerns of his or her proposed chapter. Authors will be notified by about the status of their proposals and sent chapter guidelines. Full chapters are expected to be submitted by , and all interested authors must consult the journal's guidelines for manuscript submissions at <http://www.igi-global.com/.../contributor-r.../before-you-write/> prior to submission. All submitted chapters will be reviewed on a double-blind review basis. Contributors may also be requested to serve as reviewers for this project.

Note: There are no submission or acceptance fees for manuscripts submitted to this book publication, E-Discovery Tools and Applications in Modern Libraries. All manuscripts are accepted based on a double-blind peer review editorial process.
