PROJECTS

Result Analysis System

This project based on for manage the information about various students enrolled course in different years, the marks obtained by the various students in various subjects in different semesters.

Freelancer Portal for Homemakers

The freelancer portal for homemakers, provided a platform for homemakers to showcase their skills and find freelance opportunities. The portal has a user-friendly interface which allows homemakers to create profiles, upload their work samples, and search for relevant projects. This platform empowers homemakers by connecting them with clients and enables them to monetize their skills from the comfort of their homes.

EXPERIANCE

Python Web Development Intern (Elite Software)

Mar 2023 – June 2023

During my web development internship in Python and Django, I gained valuable skills and knowledge. I learned to design and develop web applications using the Django framework, creating robust and scalable websites. I gained proficiency in database management. This internship provided me with a strong foundation in web development and equipped me with the necessary tools to build dynamic and interactive websites
